

provides \$250 million a year for 4 years to reimburse state and local governments and local health care providers for emergency health services provided to undocumented aliens.

The Congressional Budget Office says helping border states deal with this problem will cost \$1.45 billion a year. The United States should not have to bear this burden alone. The Government of Mexico has an obligation to provide its citizens with greater health care services and help stem the tidal wave of illegal immigrants into this country. One way the Mexican government can be helpful is to provide matching funds for projects like the Nogales Trauma Center. It seems to me that the better job the Mexican government can do to provide medical care for its own people, the fewer Mexicans will be attracted to cross the border to obtain medical care. In Arizona and other border states the Mexican government needs to do more and I will work with you to urge them to take these matters seriously.

However, if the Mexican government is unwilling or unable to work with us over the next year, I fully intend to offer an amendment next year that would eliminate all aid provided to the government of Mexico in the Foreign Operations Appropriations Bill and redirect those funds to states, localities, and health care providers to help deal with the crushing burden of health care costs for illegal aliens.

FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS ACT, 2004

SPEECH OF

HON. JIM KOLBE

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 23, 2003

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 2800) making appropriations for foreign operations, export financing, and related programs for the fiscal year ending September 30, 2004, and for other purposes:

Mr. KOLBE. Mr. Chairman, I appreciate Congressman HAYWORTH's concern on the issue of medical care for undocumented aliens. He and I are both from Arizona. We know very well the concerns of our state.

Together, we are actively working to get the federal government to compensate state and local governments along the border for the costs resulting from illegal immigration or undocumented entries along the border. There is currently no federal or state policy to reimburse medical care providers for their treatment of illegal immigrants not in custody or who do not possess proof of residency in Arizona. During the past six years, Arizona has experienced a drastic surge in illegal immigration due to recent policy of sealing off Texas and California borders. Therefore, Arizona hospitals and ambulance service providers have had to shoulder an increasingly harsh economic burden.

If we fail to act quickly, our hospitals will go bankrupt leaving the citizens in many areas of Arizona without access to medical care.

Just this week, I introduced H.R. 2807, The Border Hospital Survival and Illegal Immigrant Care Act. This legislation aims to address the

shortcomings created by Immigration and Naturalization Service policy instructing the Border Patrol to not apprehend illegal immigrants injured in the process of crossing the border thereby avoiding financial responsibility.

It is a bipartisan effort being supported by several Republicans and Democrats across the border region, including Representatives REYES, FILNER, PASTOR, RENZI, and GRIJALVA.

I know the intent of Congressman HAYWORTH's floor amendment to the Foreign Operations appropriations bill is to get greater Mexican attention and resources on this issue. I think that is appropriate.

There is an innovative pilot project underway that may actually yield commitment on a larger scale from the Mexican government on these issues.

Just recently USAID contributed resources to establish a triage and stabilization unit at the General Hospital in Nogales, Sonora located in Mexico just across from Nogales, Arizona.

This unit would seek to take care of most emergency medical needs of Mexican citizens on the Mexican side of the border in Nogales, Sonora. I encouraged and supported this leadership by USAID and the U.S. government.

In the spirit of public private partnerships, its funding composition has several components:

\$350,000 from USAID/Mexico and a USAID Global Health agreement with EngenderHealth, a U.S. NGO,

Nearly \$200,000 of cost-sharing support from Arizona partner organizations, principally the USAID grantee, Tucson's University Medical Center Foundation,

2,000,000 pesos from Mexican Federal and State Government, and

1,000,000 pesos from local Mexican business association.

I recognize the goal of Congressman HAYWORTH and I appreciate his willingness to withdraw the floor amendment to the Foreign Operations appropriations bill.

As I continue to work on this issue, I would propose that he and I work together to bring greater focus to this important issue.

Cooperation in support of Mexico's economic and social development and its consolidation of democratic institutions and practices ranks high in the range of U.S. policy interests. This national interest of the U.S. mirrors what is in our intense local Arizona interest.

I plan to work with the distinguished Member of Arizona on this issue. In the near future, I hope you can consider co-sponsoring H.R. 2807, The Border Hospital Survival and Illegal Immigrant Care Act.

HONORING GEN. LESTER L. LYLES ON HIS RETIREMENT

HON. DAVID L. HOBSON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 24, 2003

Mr. HOBSON. Mr. Speaker, I rise today to pay tribute to Gen. Lester L. Lyles, United States Air Force, who will soon be retiring from the U.S. military after 35 years of distinguished service to our nation.

Gen. Lester L. Lyles is currently the Commanding General of the Air Force Material Command, headquartered at Wright-Patterson Air Force Base in the 7th Congressional Dis-

trict. The command conducts research, development, test and evaluation, and provides acquisition management services and logistics support necessary to keep Air Force weapons systems combat-ready.

The general entered the Air Force in 1968 as a distinguished graduate of the Air Force ROTC program. He has served in various assignments, from the Headquarters of the U.S. Air Force, to the Air Force Systems Command (AFSC). The general became AFSC headquarters' Assistant Deputy Chief of Staff for Requirements in 1989, and Deputy Chief of Staff for Requirements in 1990.

From 1992 to 1996, he served consecutively as: Vice Commander and then Commander of the Ogden Air Logistics Center at Hill Air Force Base in Utah, and then commander of the Space and Missile Systems Center at Los Angeles Air Force Base in California.

The general became the Director of the Ballistic Missile Defense Organization in 1996, which is certainly one of the most politically charged offices in the Pentagon.

In May 1999, he was assigned as Vice Chief of Staff at Headquarters, U.S. Air Force. He assumed his current position in April 2000.

I have had the privilege to work with the General on many occasions, since we have the mutual goal of seeing the Air Force (and Wright-Patterson Air Force Base) maintain its role as the preeminent leader in aerospace and advanced technology research.

General Lyles has always understood what has needed to be done, and we have worked very well together to maintain a robust research atmosphere at Wright-Pat. In addition to being a great leader and administrator, General Lyles is also the only African-American four-star general in the Air Force.

This makes him an outstanding role model for the youth of today as an example of what can be accomplished through hard work and perseverance. In fact, in February of this year, General Lyles received the Black Engineer of the Year Award for lifetime achievement. This award is presented on behalf of the Council of Engineering Deans of the Historically Black Colleges and Universities, Lockheed Martin, Daimler Chrysler and U.S. Black Engineer & Information Technology Magazine.

As befitting a leader of his stature, General Lyles has an impressive academic background including: a Bachelor of Science degree in mechanical engineering from Howard University in Washington, D.C., and a Master of Science degree in mechanical and nuclear engineering from the Air Force Institute of Technology Program at New Mexico State University in Las Cruces.

Through his advancement in military rank, he has also attended: the Defense Systems Management College, the Armed Forces Staff College, the National War College, and most recently he completed a National and International Security Management Course at Harvard University.

And, like any successful person, General Lyles is supported by a strong family relationship with his wife of 33 years, Mina, and their four children.

During my tenure in Congress, it has been my honor to work with several consecutive commanding generals of the Air Force Material Command. Each one has been professional, dedicated and a credit to the caliber of general officers in the U.S. Air Force. However, General Lyles has greatly impressed not
